

Homework January 21 - January 25

Read for 10 minutes each night and record what you read in your reading log.

In class we have been exploring the topic of "soils in the environment" which falls under the Science strand "Earth and Space Systems." On the lines below, list some facts that you have learned about "soils in the environment" (e.g. types of soil, what soil is made up of, describe different soils, who lives in soil, who needs soil, what is good for soil, what is bad for soil, what is soil good for).

Time and Calendar:

Jacob reads for 20 minutes each night. After two weeks has he read for 2 hours? Yes or No? Justify your answer in the space below.

Starting on **January 21**, what date will it be in 2 weeks and 2 days? Use a calendar to help you. It will be.....

Georgia's brother is going to be 2 years and 7 months old. How many months old will he be? Explain your thinking. Use the back side of the page to show your work.
